

Week 1 Assignment

Overview

This assignment is designed to ensure that you have the correct working development environment for the course and have access to the code demos.

Part 1: Development Environment Setup

Follow and complete the “[Setting Up Development Environment](#)” guide to setup your development environment for the course.

Part 2: Accessing the Code Demos

Let's test your development environment setup by accessing a sample app called Community Events. Follow and complete this guide to access the code demos: [Guide: Cloning a Next.js Project Repository](#)

Part 3: Assignment Submission

Upload a single DOC or PDF file to Brightspace. The document must contain:

1. **Screenshots** proving the successful installation of all required software:
 - Git
 - GitHub Desktop
 - Node.js
 - Visual Studio Code (with the following extensions installed):
 - GitHub Copilot
 - Tailwind CSS Intellisense
 - Prettier
 - Code Spell Checker
2. **Screenshots** showing the community events application running successfully in a browser.
